

KV MEGHANA

B.E. Computer Science and Engineering

Ballari, Karnataka, India | +91-8660398687 | kvmeghana07@gmail.com
github.com/kvmeghana07 | linkedin.com/in/kv-meghana-949351413

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with strong foundations in C, Python, Data Structures, and algorithmic problem-solving. Hands-on experience developing practical applications, handling dynamic data, and applying version control with Git and VS Code. Proven ability to build functional prototypes and collaborate in fast-paced hackathons. Passionate about Software Development, Data Analytics, and Core Computing.

EDUCATION

Ballari Institute of Technology and Management (BITM), Ballari

B.E. in Computer Science and Engineering (Data Science)

Ballari, Karnataka

2026 Present CGPA-9.58

Relevant Coursework: Data Structures and Algorithms, Programming in C, Python Programming, Core Computer Science, Computer Organization.

Pre-University Course (PUC)

Science (PCMB)

Karnataka

[84.67%]

Secondary School Leaving Certificate (SSLC)

Class 10

Karnataka

[95.2%]

TECHNICAL SKILLS

Programming: Python, C, Java, C++

Core Computer Science: Data Structures and Algorithms, Object-Oriented Logic, NumPy.

Tools and Platforms: Git, GitHub, Visual Studio Code.

Hardware & Electronics: Basic Electronics, Zener Diodes, Solar Integration Systems.

PROJECTS

Self-Cleaning Solar Panel System

Hardware Prototyping, Embedded Systems

GitHub: <https://github.com/kvmeghana07>

- Designed an automated low-cost cleaning mechanism using embedded components and micro-pump systems.
- Developed prototype flow diagrams, system architecture, and experimental testing frameworks to validate cleaning efficiency.
- Constructed a functional physical scale model using pump mechanisms, fluid piping, and structural materials.

Bank Management System

Python, File Handling, OOPS

GitHub: <https://github.com/kvmeghana07>

- Developed a Python application to manage account creation, deposit, withdrawal, and balance enquiry operations.
- Applied Object-Oriented Programming (OOP) concepts to implement secure user authentication and data encapsulation.
- Utilized local file handling and data structure techniques to ensure persistent customer transaction storage.

Automatic Whistle Counter in Pressure Cooker

Microcontroller, Sound/Vibration Sensors, Embedded C

GitHub: <https://github.com/kvmeghana07>

- Designed a smart kitchen safety prototype to track pressure cooker whistles using acoustic/vibration sensors.
- Programmed threshold detection logic in embedded system firmware to accurately register each whistle release.
- Integrated an auto-cutoff switch and alert module to turn off the stove once the pre-set whistle count is reached.

Employee Salary Calculation

C Programming, Dynamic Memory, Structures

GitHub: <https://github.com/kvmeghana07>

- Engineered a C-based system to process basic pay, allowances (DA, HRA), and deductions to compute net salary.
- Utilized C structures and pointers for efficient dynamic allocation and batch processing of employee records.
- Implemented input validation and error handling routines to prevent overflow and incorrect calculation states.

ACHIEVEMENTS

- Participated in **HACKARENA C4 2026** conducted by BITM CSE-DS, a 12-hour continuous hackathon collaborating to build practical technical solutions under time constraints. Scored **91.5/100**
- Successfully conceptualized and built a website on the topic **Student Wellness and Performance Analyzer**.

CERTIFICATIONS

- C Internship BITM**, [August, 2026]
- Workshop on AI Tools BITM**, [September, 2026]

ADDITIONAL INFORMATION

Career Interests: Data Science, Software Engineering, Artificial Intelligence, Machine Learning, Application Development, Core Computing

Current Focus: Data Structures and Algorithms, C/Python Development, Git/GitHub, and prototype development, SQL.
